

INTRODUCING THE LIPPMANN 4818 PRIME MOVER

ECONOMICAL, MULTI-PRODUCT RECYCLE CRUSHING AND SCREENING

When your recycle crushing operation needs a high quality, yet economical, self-contained crushing and screening plant designed to produce multiple products, you want the Lippmann 4818 Prime Mover.

The Prime Mover handles concrete full of rebar, asphalt, brick, block, and other C&D debris to produce the high quality products your customers need. It features Lippmann's reliable 4248 horizontal shaft impactor, a brute of a crusher with its heavy rotor, new preferred locking device, long-life special alloy wear parts, and easy access hydraulic hood. The unit incorporates Lippmann's 18'x45" heavy-duty vibrating grizzly feeder with quick removal hopper module, plus several superior plant features over the competition, such as:

- a larger 6'x16' double-deck incline screen,
- a removable on-plant 350kW generator,
- a conveyor that travels on plant and folds for easy transport,

all perfectly matched on a heavy-duty chassis and powered by a Cummins 460 HP diesel engine. It's the optimum portable crushing and screening value on the market. Best of all, it's backed by Lippmann's high level of applications expertise and aftermarket product support.

The 4818 Prime Mover delivers precise material sizing in a complete, easily transportable, high volume plant designed for quick set-up. Contact us today with your recycle crushing needs.
