PECKHAM INDUSTRIES, INC.  
PLANT MANAGER

BRUCE ALLEN  
WINGDALE MATERIALS  
PLANT MANAGER

MIKE DENTON  
WINGDALE MATERIALS  
MINE FOREMAN

When Peckham Industries, Inc., one of the largest most respected material suppliers in New York's Hudson Valley looked for a primary crusher for its impressive Wingdale underground granite mine, they chose the Lippmann 4248 Portable Jaw.

"We were approached by all the leading Jaw manufacturers, but it was evident the Lippmann was built to crush hard rock. Very robust, a massive frame, deep crushing chamber, the design of the pitman and oversized shaft," says Bruce Allen, Wingdale Materials Plant Manager.

"We're getting the production we had hoped for" adds Mike Denton, Wingdale's Plant Foreman. Fed by 20 ton bucket loads, the Lippmann 4248 Jaw with 56" x 26' Vibrating Feeder, Hopper Extensions and 10' Step Grizzly, devours Wingdale's hard granite at 800-900 TPH.

Do you need a Jaw you can believe in to handle your mountainous tasks? Contact Lippmann today.
