

INTRODUCING

OUR NEW LINE OF IMPACTORS

VALUE, HIGH PRODUCTION, SIMPLICITY OF DESIGN

COMPLETE TWO-STAGE JAW/IMPACTOR RECYCLE CRUSHING SYSTEMS NOW AVAILABLE FROM LIPPMANN

Lippmann now introduces a full line of impact crushing equipment for recycling, so when you need complete, superior crushing and screening solutions designed to handle reinforced concrete and asphalt to produce clean, saleable aggregates, count on Lippmann. They can offer you today's best value in two-stage portable jaw/impact recycle crushing systems. Quality machinery backed by the kind of personal, single source application expertise and product support that Lippmann can provide.

Lippmann custom engineers material recycling systems mounted on heavy duty chassis which incorporate robust feeding, crushing, screening and conveying equipment with magnetic separators, reinforced belting and other features to suit your specific requirements. Lippmann Jaw and Impact Recycle Crushing Plants are designed for high productivity, easy transportability, quick set-up and tear down,

and reduced wear costs.

The Lippmann Primary Jaw is a dependable brute that achieves maximum capacity and drastically reduces material preparation costs.

Lippmann high performance Secondary Impact Crushing Plants offer reliability, simplicity of design, ease of maintenance and long-life wear parts resulting in desired capacities, product flexibility, minimum downtime and increased production.

Lippmann also offers the 4248 Urban Crushing Plant, a self-contained impact crushing plant which operates as a primary in recycling applications, and as a secondary in aggregate installations.

If you're serious about recycle crushing, choose the equipment designed to stand up to the most demanding applications for the long haul. Contact Lippmann-Milwaukee today.

THE NAME YOU SHOULD KNOW FOR QUALITY CRUSHING MACHINERY.
