

INTRODUCING THE NEW...

# Lippmann 3862 Jaw Crusher

L3862 Portable Plant with option of 62 x 18, 20 or 24 ft., or 51 x 20 ft. Lippmann Feeder

LT3862 Track Mounted Mobile Plant with option of 62 x 18 or 20 ft., or 51 x 20 ft. Lippmann Feeder

# LIPPMANN

ONCE YOU OWN A LIPPMANN, YOU'LL NEVER BE SATISFIED WITH ANY OTHER CRUSHER.

**The Lippmann 3862.  
Reserve yours today!**

In the tradition of Lippmann Jaw Crushers, built for unmatched reliability and productivity, we introduce the new 3862 Jaw.

Specially engineered for transportability, you've never experienced high capacity crushing from a portable or mobile plant like this!

Due to a lighter weight design, a lower profile, and an extra wide feed opening that devours large, hard abrasive rock, it's the ultimate primary crushing solution to achieve maximum productivity efficiently, from site to site. And because it's a Lippmann, strength and a lifetime of dependability is assured.

- Oversized heat treated shaft.
- Extra large radial thrust tapered roller bearings.
- Stress-relieved one-piece frame.
- One-piece cast pitman with hardened barrel wear liners.
- Replaceable toe wear liners on the swing and stationary jaw.
- Easy in/out toggle bearing wedges.
- Time-saving hydraulic setting adjustment on the fly.
- Extra wide feed opening.
- Larger stroke, deeper crushing motion, steeper nip angle.
- Higher capacity and greater throughput.
